Q8: How to tell human hair with synthetic hair?

A: human hair has natural protein . It is easy to tell by burning and smell : human hair will be ash , which will go away after pinching. hair will smell foul . When burning , the human hair will show white smoke. While synthetic hair will be a sticky ball after burning and will show black smoke. Moreover, human hair may have very few gray hair and split ends. It is normal and not a quality problem.
