FAQ:

Q1. How much hair do I need?

Our suggestion: 12"-14": 3 bundles 16"-22": 3 bundles 24"-28": 4 bundles or more

Q2. What type of hair care products should I use?

A : Treat this hair just as if it was your own hair.

1, Use good shampoo and hair conditioner to care is important for keeping the hair soft and shiny.

2, You could use gel or spray styling products to keep the hair style.

3, Olive oil will be a good choice to keep the hair healthy.

Q3. Why are my hair extensions getting tangled?

A: It could be caused by dry hair. Pls make sure to wash & condition your hair at least once a week, twice a week is better. Comb the hair from time to time. You could go to your stylist for further suggestions.

Q4. How long does it last?

A : It depends on how you maintain it. Treat it like your own hair and take good care of it, then normally it could last longer than 1 year.

Q5: Why the colors of hair extensions don't seem exactly as the pictures show or description says?

A: Different monitor have different displays. The same color number may have a little color difference. You could dye the hair if you need different colour.

Q6: Can they be straightened, curled ?

A: Sure. However, don't do it too frequently, or the heat will make the hair easily get dry and tangled.

Q7: Can I dye/color the hair?

A. Yes. It can be. As a general rule it is easier to darken the hair than to lighten it. We suggest to dye darker, since it is difficult for the original colour to fade.

We highly recommend having your hairdresser dye the virgin hair. Colouring by yourself will take a risk of not coming out the shade you want. If you can't get to a salon, please always use a good quality products and test a small sample first.

Q8: How to tell human hair with synthetic hair?

A: human hair has natural protein . It is easy to tell by burning and smell : human hair will be ash , which will go away after pinching. When burning , it will show white smoke. While synthetic hair will be a sticky ball after burning and will show black smoke. Moreover, human hair may have very few gray hair and split ends. It is normal and not a quality problem.
