#### product description

Yazaki Automotive Connectors are critical to today's cars. Without them, it would be nearly impossible to build or service a car. Whenever a bundle of wires passes through or attaches to a component of the car that might have to be removed, there must be a connector there to allow for that removal. A single connector can have more than 100 wires. In the past, unreliable connectors have been the source of many electrical problems. Connectors have to be waterproof (modern connectors have several seals to keep out moisture), corrosion proof and provide good electrical contact for the life of the vehicle.

#### FAQ:

1.Q:Do you have a catalogue? Can you send me the catalogue to have a check of all your products?

A: Yes,can contact us on line or send an Email to get catalogue.

2. Q: I can't find the product on your catalogue, can you make this product for me?

A: Our catalogue shows most of our products,but not all.So just let us know what product do you need,and how many do you want.

If we do not have it,we can also design and make a new mould to produce it.For your reference, making a ordinary mould will take about 35-45 days.

3. Q: Can you provide samples ? Are the samples free ?

A: Yes , we provide 5-10 pcs connector free samples for test.  
But you have to pay for the shipping cost

4. Q : What about your delivery time?

A: The stock goods delivery within 1 day, customized goods delivery within 5-7days
