### Basic Information

- Place of Origin: 00
- Brand Name: 2
- Certification: 3
- Model Number: ORC
- Minimum Order Quantity: 100
- Price: communicate
- Packaging Details: 付款方式
- Delivery Time: 供 能力
- Payment Terms: 期限
- Supply Ability: 常 包装

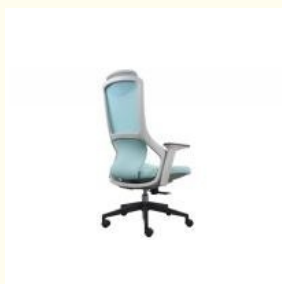

### Product Specification

- Color: Multiple
- Mail Packing: Yes
- Rotary: 360 Degrees
- Height: Adjustable
- Load Bearing: 300 Lbs
- Gas Lift: CLASS 3 Gaslift
- Base: Nylon Or Aluminum
- Metal Type: Iron
- Metal: Type Iron
- Thickness: 203\*193\*15cm
- Box Type: Self Erecting Boxes
- Radiation Power: 840~1300MW
- Universal Type: Fit For 80% Model Cars' Injectors
- Indian Hair: Yes
- Size: 390x240x185cm

5. Gas spring: TUV approved Class 3;
6. Base: Aluminum alloy star base or nylon base
7. Castor: nylon with fiber frame PU pad, with ABS spacer against noise.
8. BIFMA standard.

#### Advantage

We ensure that you sit on healthy seat by our technical innovation, that is we use steel wire for supporting without using polywood board which requires glue to paste the foam and seat board. The recoverability rate of the material can reach 98%. This technique ensures the chair more environmental and healthy. With the structure, it has a better breathability, resilience and comfort. The chair features a high-quality, molded foam to provide support. It feels a little firm at first but gets more comfortable after extended use. And the chair ensures great comfort, whenever you use it for work, snap or rest, it is always comfortable.

#### chassis

The chassis of the office chair is the technology and core component of the office chair. The chassis is to the office chair and the engine is to the car. Many powerful office chairs rely on the chassis to achieve. In particular, the chassis of foreign big brand office chairs has always become a technical bottleneck that is difficult to achieve in domestic imitations. Most of the so-called high imitations in China are only imitations of appearance, but cannot achieve internal functions. The chassis of a high-end office chair weighs almost half the weight of the chair. So we also use weighing to determine the quality of the office chair.

LUMBAR

Wrapped surround support lumbar designed is more fit for human built.
