Instructions

Do you ever have back pain from sitting at your desk? This is usually because your office chair is missing the correct back support or cannot adjust for proper posture. Not anymore. This chair will fully support your spine and allow for perfect posture. So you can go about your day without an aching back.

Description

The user can adjust the tension of the free-floating tilt to match their body weight. Max Weight Capacity: 150kg. Fully adjustable height with a 360-degree swivel offers a flexible range of motion. This chair can easily adjust the height of the seats according to human spine structure, providing neck, shoulder, waist, and coccyx protection for long hour sitting. The wide padded seat is covered with breathable densely woven polyester fabric that prevents dirt, dust, and food particles from settling into the fiber of this computer chair.

Advantage

Combination of creativity and ergonomics makes great comfort Same model with different configurations for different demands Human-oriented design with human S-curve Full series suitable for multiple application in different spaces Featured material selections Multiple color options

What is an office chair?

Work chairs are ergonomically designed office chairs that provide superior comfort and support to the user's body and include mechanisms such as body balance and active seating to promote increased body movement while seated. Our mesh task office chairs provide more support and allow the body to breathe.
