Effect

An elegant spiral pattern was printed on the lamp post. The light pattern blooms with a unique beauty in the open light. The second major feature of this table lamp is: it is in line with the double-layer design that is popular this year, and even the quilt has become popular in the double-layer society. How can we not integrate into the design of the table lamp. This double-layer design makes people more visual.

LED desk lamp

The LED desk lamp is very power-saving. If the battery capacity is large and the continuous discharge capacity is strong, it is not easy to detect the change in the brightness of the LED desk lamp during the whole lighting process. It is indeed difficult to judge when the discharge is over by visual inspection. Use a multimeter to check the battery voltage to determine whether it is time to charge.

Effect

A very retro-style table lamp, the design of hollow wrought iron appears connotative. If you like retro and elegant feeling, you might as well bring home such a retro table lamp, which can light up the night warmly and softly, making our home warm and comfortable.
