

Home decor modern luxury bed fabric shade metal reading lamps for bedroom

Our Product Introduction

Basic Information

- Place of Origin: 00
- Brand Name: 2
- Certification: 3
- Model Number: zz
- Minimum Order Quantity: 100
- Price: Ten thousand dollars
- Packaging Details: 付款方式
- Delivery Time: 供 能力
- Payment Terms: 期限
- Supply Ability: 常 包装

Product Specification

- Power Supply: Battery
- Light Source: Incandescent Light Bulb
- Style: Mordern
- Lamp Body Material: Aluminum
- Lifespan (hours): 50000
- Waterproof: IP54
- Support Dimmer: Yes
- LOGO: Customizable
- Metal: Type Iron
- Thickness: 203*193*15cm
- Box Type: Self Erecting Boxes
- Radiation Power: 840~1300MW
- Metal Type: Iron
- Universal Type: Fit For 80% Model Cars' Injectors
- Indian Hair: Yes

Product Description

Home decor modern luxury bed fabric shade metal reading lamps for bedroom

Lamp Body Material:	Iron
Input Voltage(V):	110-120
Lamp Luminous Efficiency(lm/w):	110
Warranty(Year):	1-Year
Color Rendering Index(Ra):	70
Power Supply:	Electric
Light Source:	Incandescent Bulbs
Support Dimmer:	Yes

Describe

What role does lighting play in home life? In the dark night, the light is the wizard, and it is the master of creating a warm atmosphere. Through the layers of light and shadow, the space is more vibrant; during the day, lamps are transformed into decorative art in the room, which embellishes life together with furniture, fabrics and decorations.

Touch

The principle of the touch table lamp is to install an electronic touch IC inside, which forms a control loop with the electrode sheet where the table lamp touches. When the human body touches the sensing electrode, the touch signal is transmitted to the touch sensing terminal by pulsating DC current, and then the touch sensing terminal will send a trigger pulse signal to control the light on; touch again, the touch signal will be pulsed again. The direct current generates a pulse signal and transmits it to the touch sensing terminal. At this time, the touch sensing terminal will stop sending out the trigger pulse signal. When the alternating current crosses zero, the light will naturally go out.

remote control

The analog brightening desk lamp and the analog variable control center have remote control on and off, various lights can be adjusted at will, and the light can be automatically stored in memory. The above functions are realized by using a button on the remote control. Press the button set on the remote control. Press and release it to turn on or off. Press and hold the button to adjust the light, from the off state. Slowly to the brightest, from the brightest to the off state in a continuous cycle, when you need some kind of light, just release the handle, when you turn off the light, the light state at that time is automatically saved, etc. The brightness state that is automatically memorized when the light is turned on next time will appear, thereby saving electricity and protecting the eyes.
