Product Description

7x15W RGBW LED Beam Mini Moving Head Light High Brightness 30°

Product Description:

Mini bee eyes 7x15W k5 led moving head light is a high performance wash light, a breathtaking beam light, and a creator of completely new spectacular visual effects. Its unparalleled versatility makes it an extremely interesting creative tool for all lighting designers. The mini bee eyes is brighter than any LED-wash with the same rated power, thanks to its special optical unit with a truly amazing lumen/watt ratio. The zoom ranges from 4° to 60° and it is therefore suitable both for environments with low ceilings (small theatres and TV studios, for example), where large angles are extremely useful, and for shows in arenas or large environments, where a tight zoom is perfect. When the 7pcs b-eye beam is zoomed down to 4°, the "wash" light turns into a "beam" fixture. The mini k5 b-eye 7x15w led moving head therefore becomes a surprising mid-air parallel effect light, capable of generating a pulsating beam of micro-rays, which may be controlled individually, each with its own colors and shades. All the parameters of each LED can be completely controlled. Lastly, the mini bee eyes 7pcs k5 led moving head light introduces a completely new feature: the front lens may be rotated to create lots of small bright compositions, which may be opened and closed like petals. By adding colors and dynamic graphics, the B-EYE generates never-seen-before graphic light effects.
