Product Description

LED Downlight Retrofit Kit 6 In Nominal Size 3000K 1000 Lm Light Output 13 W Max Watt

product description

LED Downlight Retrofit Kits convert traditional downlights to LED technology to reduce operating costs. Sometimes called modules, they replace bulbs and light fixture trim while attached to an existing enclosure, so they don't have to be completely removed, replaced, and rewired. Can lights (also called downlights) have a barrel-shaped housing recessed into the ceiling for a complete look. They aim the light down and are used for task lighting on work surfaces, to accentuate objects or architectural features, or for general lighting in hallways, offices and reception areas.
