FAQ:

Natural Human Hair Wigs

Q: What's the difference between human hair and synthetic hair wigs?

A: Human hair wigs are made of 100% real human hair, while synthetic hair wigs are made of artificial fiber. Human hair wigs are more natural and durable, and can be styled like your own hair, while synthetic hair wigs are easier to care for and cost less.

Q: How long do natural human hair wigs last?

A: With proper care, natural human hair wigs can last about 6 to 12 months. The life of the wig will depend on how often it is worn and how well it is maintained.

Q: How do I care for my natural human hair wig?

A: You can use shampoo and conditioner formulated for human hair to gently cleanse and maintain your wig. Be sure to use a wide tooth comb to detangle the hair and air dry it after washing. Do not use a blow dryer or flat iron to style the wig as the heat may damage the hair.

Q: What is the best way to store my natural human hair wig?

A: When you're not wearing your wig, store it on a wig stand or mannequin head. Do not store it in a plastic bag, as this can cause the hair to become dry and brittle.

Q: Can I dye or perm my natural human hair wig?

A: Yes, you can dye or perm your human hair wig if you wish. However, it is recommended to have a professional stylist do this for you to ensure that the hair is handled properly and the desired results are achieved.
